

Advantages of upgrading to Adapt 2 from the Original Snap Series Mattress

Discover the benefits of our new Adapt 2 Series:

MODULAR: This fully modular surface provides the optimal experience for each client. With just one mattress, there are multiple configurations available by repositioning the ROHO®, GelFlex™ or High Resiliency (HR) foam sections. This adaptability, combined with the proven clinical benefits of SRT, make this the best choice for medium to high risk clients.

INTERCHANGEABLE/ FLIPPABLE INSERTS: New flippable inserts with no snaps promote ease of use and longevity.

GELFLEX: New 3" high GelFlex™ visco foam inserts provide increased immersion and envelopment with the cooling properties of gel polymer.

PERMANENT FOOT BOLSTER: The 4" permanent GelFlex™ foot bolster is a cost effective method to hold the inserts in place without the need for snaps, nor the need to purchase an additional section to complete mattress.

SNAP REMOVAL: Removal of the snaps inhibits the growth of bacteria along the inner lining and ensures a cleaner surface area.

SRT: Our patented Shear Reduction Technology (SRT) is an innovative solution designed to address shearing forces present during client movement in bed or when changing the position of the bed frame, at the same time ensuring proper pressure redistribution.

FIRE BARRIER: The fire barrier on the base and inserts increases the fire retardancy to California Technical Bulletin standard #129.
