

ADVANCE Mattress

With Shear Reduction Technology

Prevention Through Innovation

Addressing Shear from the Inside Out

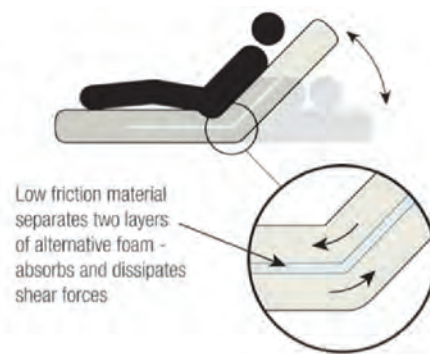

The **Advance** was designed as an economical solution to reducing the risk of skin breakdown. Our patented Shear Reduction Technology (SRT) was proven to be an optimal way to minimize the effects of pressure, friction and shear in populations where forces can damage vulnerable skin. A third party clinical trial was completed by Durham College Schools of Nursing and Engineering, which validated the technology.

5 Minds Mobility received the Colleges of Ontario Network for Industry Innovations Award for SRT.

Product Features:

- 360 degrees of movement offering reduction of shear in all directions, essential when reducing the risk of skin breakdown related to shear forces
- Excellent comfort and pressure reduction
- Head and foot sections of foam are fixed in place to ensure that the component parts of the mattress re-set themselves
- Designed to reduce the need for re-positioning
- 5-way stretch incontinent cover

Weight Capacity: 350lbs
Warranty: 2years

Standard Size: 36" x 6" x 80"
Custom Sizes Available
