

Prevention Through Innovation.

Prevention Through Innovation.

Our innovative products are designed with addressing the problems and using technology to produce solutions. We have a large line of products designed specifically with this in mind.

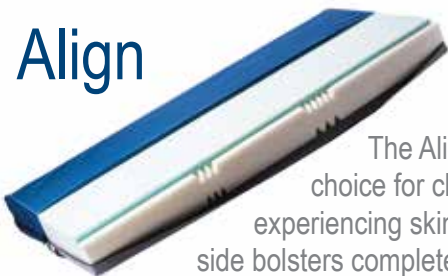

MATTRESSES

ADDRESSING SHEAR FROM THE INSIDE OUT.

5 Minds Mobility focuses on superior solutions for the painful and costly problems associated with shear and pressure management in high-risk patient groups.

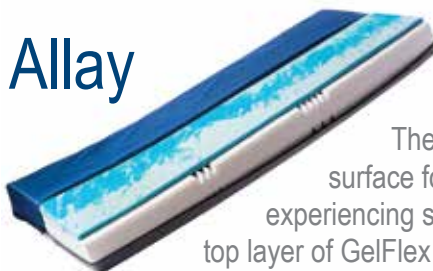

With innovations like their patented Shear Reduction Technology (SRT) and extensive use of GelFlex, 5 Minds Mobility's award-winning mattresses are designed to support your body for more comfortable and restful sleep. Achieving optimal pressure redistribution, envelopment and immersion for the prevention/reduction of pressure injuries carries through this entire line of products. Many of their products can also have the foam sections replaced with ROHO® inserts.

Align

The Align is a cost effective choice for clients at risk of experiencing skin breakdown. The side bolsters complete with accordion cuts provide an excellent transfer edge.

Allay

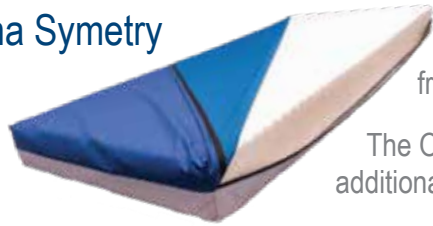

The Allay is our premium surface for the client at risk of experiencing skin breakdown. Has a top layer of GelFlex for excellent immersion and the cooling benefit of gel.

Adapt 2

The Adapt2 interchangeable foam replacement surface provides the optimal experience for each client. With just one mattress, there are multiple configurations available by repositioning the ROHO®, GelFlex™ or High Resiliency (HR) foam sections. This adaptability, combined with the proven clinical benefits of SRT, make this the best choice for medium to high risk clients.

Optima / Optima Symetry

The Optima mattresses focus on comfort, safety, durability, and budget. They come with a multi-stretch incontinent cover with handles, and a foam core constructed of 100% medical grade environmentally friendly non-allergenic foam. Mattress is reversible for longer product life.

The Optima Symetry has all the key features of the Optima, but provides additional support with firm side borders and an anti-shear liner.

Atlas

The Atlas ComfortZone Equalization Technology Mattress

The Atlas ComfortZone ETM is a non-powered, self-adjusting mattress that utilizes Equalization Technology to provide maximum pressure redistribution for the prevention and treatment of pressure injuries.

*Optional Mattress Pump

AIR CARE THERAPY SYSTEMS

True Low Air Loss and Alternating Pressure Redistribution System

Serene

True Low Air Loss and Alternating Pressure Redistribution System

Suitable for patients in high to very high risk of pressure injury. A true low air loss pressure relief mattress system designed for burn and high risk patients.

Domus 4

Alternating Pressure Redistribution System

Suitable for patients in medium to high risk of pressure injury. Multiple therapy modes can better aid in the prevention of pressure injuries for patient.

Pro-care Optima

Alternating Pressure Redistribution System

Suitable for patients in high to very high risk of pressure injuries. Auto-sensing technology with intuitive one touch set up.

MATTRESS OVERLAY SYSTEMS

ROHO

The ROHO® SOFFLEX® 2 Mattress Overlay is a cost effective solution for different care settings while providing superior skin/soft tissue protection.

The ROHO DRY FLOATATION Mattress Overlay System creates the ideal environment of protection and healing with the ORIGINAL non-powered, air-filled, adjustable, zoned, reactive mattress overlay.

The ROHO PRODIGY Mattress Overlay System provides an individualized fit in order to protect skin and soft tissue from breakdown.

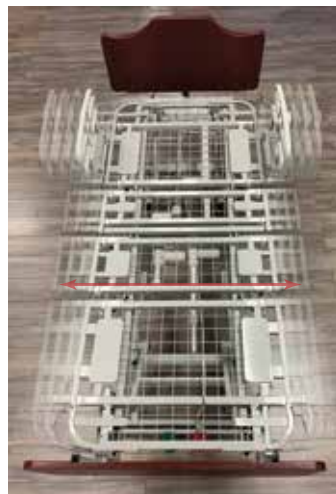

BED FRAMES

UNITY BED

The **UNITY BED** has a low height of 6.75" and a high height of 30" to meet all your caregiving and client needs. With a 12-button hand pendant and optional footboard attendant controls, customized comfort is an easy adjustment.

UNITY 600, UNITY 750

**Four expansion options
36", 39" 42" and 48"**

Standard features include:

- 12-button hand pendant with Trendelenburg, reverse Trendelenburg and Comfort Chair
- Centre step safety lock at foot end
- Flip down directional caster locks at head end
- Quick release Head/Footboard hardware
- Swivel locking casters
- Ratchet foot section
- Wall bumpers
- Mattress retainers

PATIENT LIFT / OVER THE BED TABLE / BEDSIDE COMMODE

UNITY

- Variety of slings for patient comfort
- Fully adjustable providing access to any patient lift situation
- Max user weight 180kgs/396lbs

Y403

The Patient Lifter is electronically-powered mobile lifts, designed to be used in most of the common lifting situations. For example, transfers between bed and wheelchair, to and from the toilet and bathtub or for lifting to and from the floor. Selecting the appropriate slings and accessories for each individual is important to assure maximum function and safety when using a patient lift.

- High quality, durable composite table top
- Height adjustable, locks securely and easily
- Table top can be tilted to either direction
- "H" Shape steel base for security and stability
- Easy maneuverability with 4 swivel casters

UNITYCOMPOV

- 2" swivel casters provides stability and allows table to be easily moved
- Collapsible to fit under the bed
- Tabletop can be raised with slightest upward pressure and locks securely when height adjustment handle is released
- Power-coated steel frame
- Height adjustable

UNITYTILTOV

- 19" Wide padded seat and padded back rest
- 300lb Weight Capacity
- Collapsible arm rests
- Height adjustable

BCOMMODEDA

LiftSeat® Powered toilet lifts™

LS450 Toilet Lift

Every LiftSeat is powered by our patented LiftTek Core Assistive Technology to support the sit-to-stand motion path required for getting on and off the toilet. LiftTek is the result of ground breaking research and product development focused on the biomechanics, kinematics and human factors related to toileting.

SMALL FREE-STANDING FOOTPRINT

At only 21.5" wide, LiftSeat has the smallest footprint of any product on the market, and is designed to fit the width of tight bathroom spaces and the full range of U.S. toilet sizes.

CUSTOMIZED FOR YOUR SIZE AND CLINICAL NEEDS

With configurable lift heights of up to 35", LiftSeat can accommodate the widest range of user's height, weight, and medical requirements.

ENGINEERED FOR SAFETY

The LiftSeat's free-standing design does not require it to be mounted precariously to the toilet or floor and can safely lift up to 450 lbs without the possibility of breaking your toilet or it's mounting on the wax ring. In addition, our design ensures no possibility of pinching or crunching.

WATERPROOF / PARTICLE PROOF MEDICAL ELECTRONICS

Designed for use in the wet bathroom environment.

SAFETY SYSTEMS

HALO SAFETY RING

The Halo Safety Ring, the only patented institutional bed mobility device that prevents lateral mattress movement, and gap space in the most critical zones: 1, 2, & 3.

PROVIDES - Exit points for neck, head, & chest and eliminates the four most critical zones of entrapment.

PROMOTES - Bed mobility & increases environmental independence.

BED FRAME MOUNT - Both Halo ALC and Institutional Bed Model mount to bed frame for stability.

ROTATING HANDLE - Rotates 90 degrees either direction to accommodate different user positions and allow ease of bed exit.

CONSUMER SLEEP SYSTEMS

Your Journey to a More Restful Sleep Starts Here.
