

Atlas Hybrid

With optional alternating pressure

The Atlas Hybrid is a self-adjusting mattress that utilizes equalization technology to provide maximum pressure redistribution for the prevention and treatment of pressure injuries. The multi-zone top has Serene™ foam in the middle section for immersion plus a 5-degree sloped foot section made with Super Soft™ foam to help transfer excess pressure from the heels. Beneath the top layer, interconnected chambers provide pressure redistribution, and there are 4" wide firm borders to ensure a solid transfer edge.

A manual ROHO® air pump can be used to easily adjust the softness/firmness of the chambers. Both the closure kit and pump come included with the Atlas Hybrid.

Add the Atlas Hybrid Pump to transform the mattress into a powered alternating pressure surface for enhanced support and pressure relief.

Features at a glance

- Suitable for vulnerable clients at risk for pressure injuries
- Interconnected chambers and valves for pressure redistribution
- ROHO pump to adjust the firmness
- Sloped foot section helps reduce pressure from heels
- 4" wide firm borders for safe transfers
- Fluid-resistant, four-way stretch cover that is wipeable for easy cleaning
- Maximum client weight for 42" and 48" is 600 lb, all other sizes max 450 lb
- Atlas Hybrid is available in three widths:
 - 35" / 39" / 42" / 48" and 80"L x 7"H;
- Custom configurations available
